-

Projects

"Adeeb أديب" (personal project):

It's concerned with Arabic literature. It assumes a business model that enable customers to order a print of Arabic literature in specific customization, and follow up the process. It provides better experience for partners to make bulk orders fast and easy.

My Role: Frontend & Backend development, it have 2 versions:

- "Adeeb أديب" SSR with a REST API ([Frontend's repo](#) – [Backend's repo](#))
 - Tech stack:
 - TypeScript
 - Astro & Vuejs
 - Nodejs & Expressjs
 - Postgres & TypeORM with Redis
 - Characteristics:
 - JWT authentication & authorization
 - Data validation with vee-validate & Yup
 - Dark/Light Theme
 - API tests with Mocha & Chai.
 - "Adeeb أديب" SPA with a sREST API ([Frontend's repo](#) – [Backend's repo](#))
 - Tech Stack:
 - TypeScript
 - Vuejs with Pinia & vue-router
 - Nodejs & Expressjs
 - MongoDB with Redis
 - Characteristics:
 - JWT authentication & authorization
 - Data validation with vee-validate & Yup
 - Dark/Light Theme
 - API tests with Mocha & Chai, frontend component testing with Cypress
-

Learning & Courses
